LED SLIM

Cut out acrylic from
3/4" to 1-1/2" thick.

The LEDs are embedded dot by dot and
welded together by hand.

- 1 Block of embedded LEDs 3/4" to 1-1/2" thick
- 2 Illuminated face (acrylic) with vinyl or painted (RAL® or PANTONE®)
- 3 Illuminated return (acrylic) or painted (RAL® OR PANTONE®)
- 4 Illuminated back (acrylic) or painted (RAL® OR PANTONE®)
- 5 3/8" is the minimum necessary to embed an LED
- 6 I. Acrylic is milled
II. LEDs are embedded inside the acrylic
III. LEDs are covered with a thin layer of resin to make the sign waterproof

BEVELLED OPTION

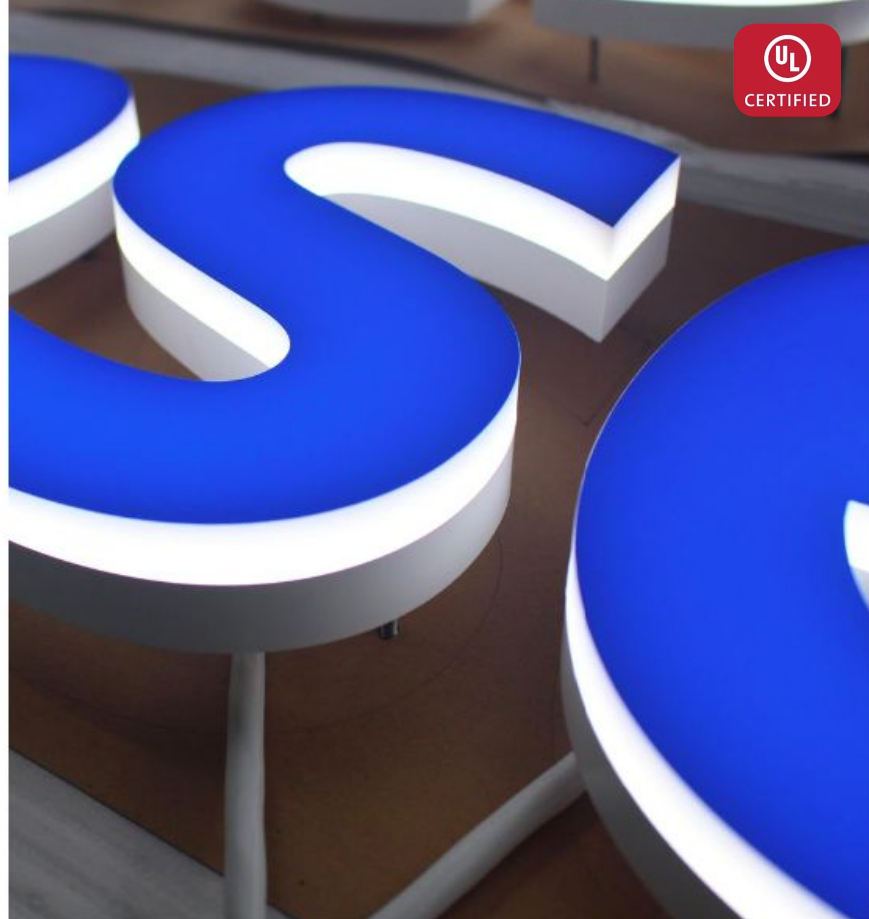

By beveling the acrylic, we can provide even lighting for signs with a stroke as thin as 1/8".

STAINLESS STEEL OPTION

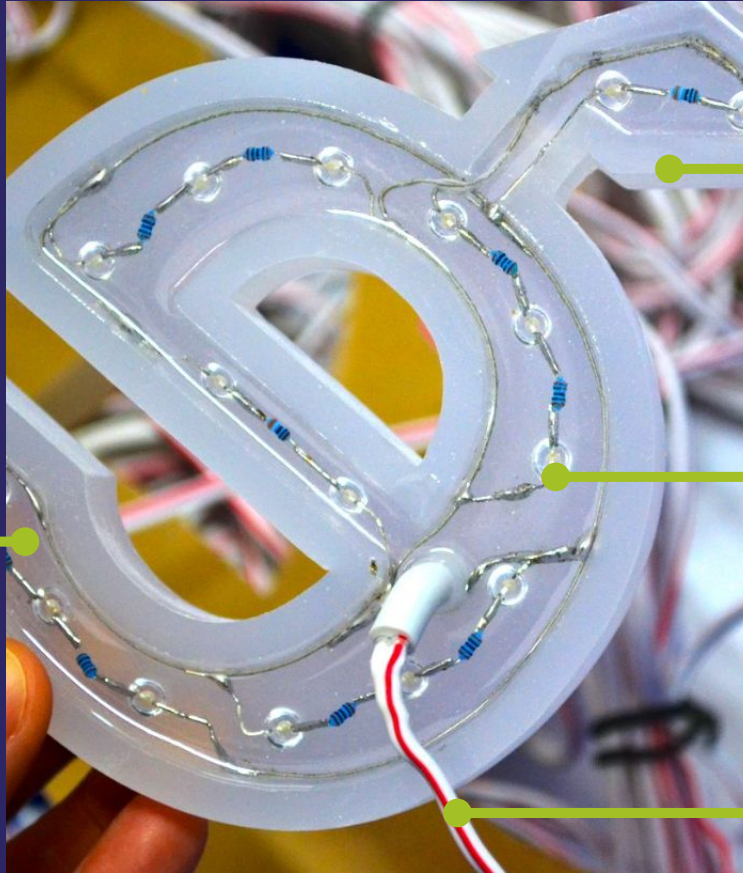

Stainless steel can be added to the faces, the sides or the backs of our signs.

E.G. STAINLESS STEEL
SIDE + BACK

EPOXY

Thin layer,
added for full
impermeability

ACRYLIC BLOCK

1" to 1-½" thick
(Depending on the
size and type of
lighting)

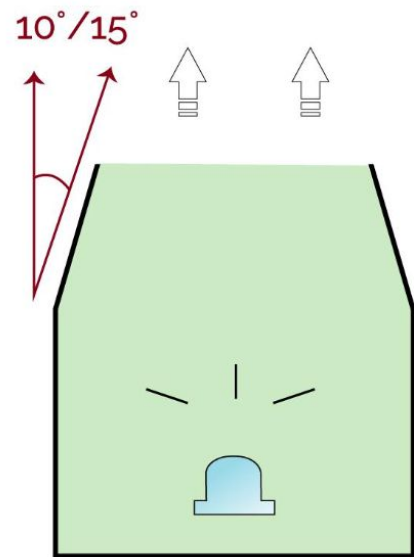

12V CREE LEDs

embedded one by
one (allow voltage
control for longer
lifespan)

**INDOOR OR
OUTDOOR WIRE**

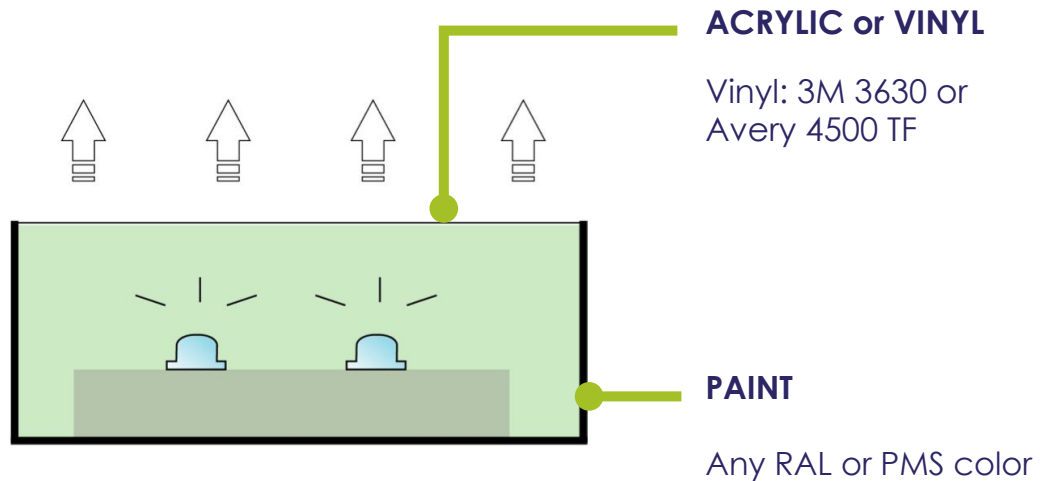

Strokes as thin as 1/8"

LED NEON

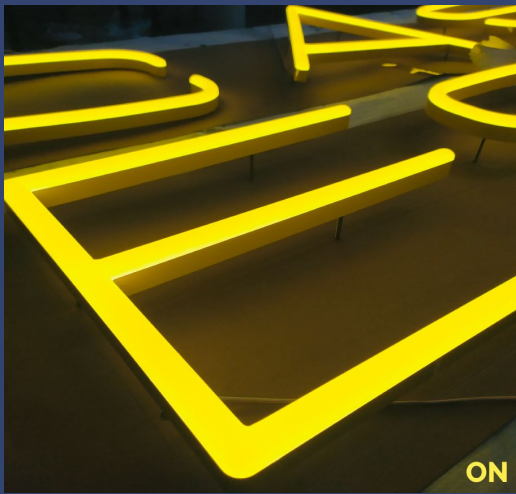

All the advantages of LEDs with that vintage neon look!

Similar to LED Slim, LED Neon gives a visual neon look while offering the advantages of LEDs. Whether indoors or outdoors, the Lika Neon sign is a guarantee of perfectly even illumination, dependability and durability.

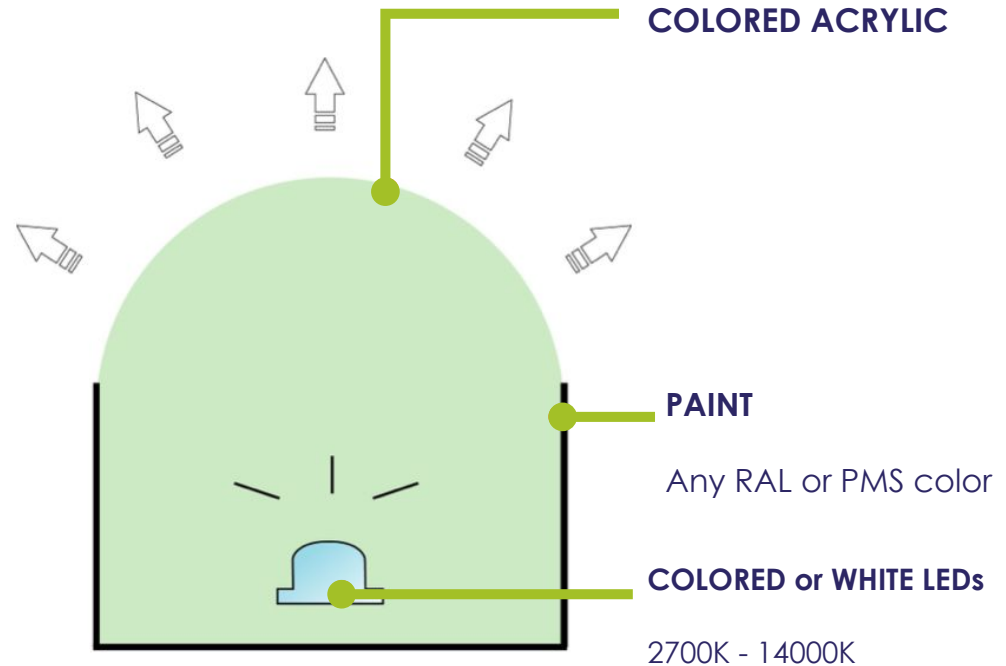

- 1 3/8" to 11/16" stroke
- 2 Acrylic face
- 3 Partially illuminated returns (half painted + half illuminated)
- 4 1-3/16" to 1-5/16" thickness

LED NEON + ALUMINUM LETTERS

MODULES: ALUMINUM

Bigger and Bolder

The AlumLit range is the best option for large signs, while still providing perfectly even illumination.

- 1 From 2-1/4" to 4-3/4" thick
- 2 Illuminated face (acrylic) with vinyl or painted (RAL® or PANTONE®)
- 3 Painted returns (RAL® or PANTONE®)
- 4 3/4" stroke is the minimum required to fit an LED module
- 5 LED modules are fixed inside the sign
